

COLLATERAL ANNOUNCEMENT

Supplementary Announcement on the daily amount of secured claim transactions for the various Global Markets services, the level of initial margin, the list of Collaterals eligible as security and their collateral values

to the Investment Services Business Regulations

Effective from: May 6, 2025

Published on: April 28, 2025

The reason for the amendment of this supplementary announcement (hereinafter: Collateral Announcement) *is to supplement the provisions for Institutional investor in Section II.5 of the Collateral Announcement.*

The amended provisions of this Collateral Announcement, highlighted in italics and green, indicate changes relative to the Collateral Announcement effective from January 7, 2025

OTP Bank Plc.

Registered office: H-1051 Budapest, Nádor utca 16.

Registered with the Court of Registry of the Metropolitan Court of Justice under No. 01-10-041585

LEI: 529900W3MOO00A18X956.

Central mailing address: 1876 Budapest

Website: <https://www.otpbank.hu>

I. Certain OTC derivative transactions

I.A Principles

1. In the case of the OTC derivative transactions listed in Section I.B – unless the Investment Services Business Regulations (hereinafter: Business Regulations), the Framework Agreement concluded with the Client or a Special Contract, Individual Agreement or the Individual Transaction provides otherwise – the Client shall secure
 - a. the value of the Individual Transaction, calculated on the basis of the methodology selected by the Bank (secured exposure amount),
 - b. to the degree accepted by the Bank (volume of collateral),
 - c. by the Collateral accepted by the Bank (type of collateral).

The amount calculated in accordance with Subsection 1.a corresponds to the secured claim as defined in the Civil Code (for the purposes of this Collateral Announcement: "**Secured Claim**"). The amount of the Secured Claim determined for the deal date is included in Section I.B for each Global Markets Service. The currency of this amount depends on the Individual Transaction as detailed in Section I.B. If the amount of the Secured Exposure is defined in a currency other than forint (HUF), the forint (HUF) equivalent of the outstanding Secured Exposure is calculated – upon each valuation, i.e. on each banking day, or even during the day in the case of intraday valuation – at the current OTP mid-rate, thus the forint (HUF) equivalent thereof will change based on the prevailing exchange rate. In addition, the amount of the Secured Claim may change daily, or even during the day depending on the valuation result of the Individual Transaction, the changes in the prevailing exchange rate and the circumstances stipulated in the Business Regulations and as specified in the information announcement "On the calculation of the base and variation margin of certain OTC derivative Individual Transactions and on the conditions determining the change in the secured claim", which forms an integral part of the Collateral Announcement. Furthermore, if the forint (HUF) equivalent of the Secured Exposure amount changes, the Bank is entitled – after or even on the deal date – send a margin call (variation margin) to the Client, who is obliged to comply with such call.

2. Based on the stipulations of subsection 1.b, the Client is obliged to cover by Collateral at least 100% of the Secured Exposure's value specified in Section I.B, unless Section I.B provides otherwise.
3. Based on the stipulations of subsection 1.c, the Client is obliged to provide the Collateral specified in the Business Regulations and the Annex 1 to cover the Secured Exposure. For the calculation of the collateral coverage, the Bank will take the Collateral into consideration at the acceptance rate specified in Annex 1. For the purpose of calculating the forint equivalent of the foreign currency collaterals, the Bank will use the current, latest OTP mid-rate.

The Individual Transactions shall be governed by the provisions of the Collateral Announcement effective on the deal date of the Individual Transaction; furthermore, the amendments of the provisions of the Collateral Announcement that affect the

already existing Individual Transactions shall also be applied. The previous effective documents of the Collateral Announcement are available in the business regulations menu at [www.otpbank.hu: https://www.otpbank.hu/portal/hu/Kondiciok/BefektetesiSzolgaltatas](https://www.otpbank.hu/portal/hu/Kondiciok/BefektetesiSzolgaltatas).

4. If the Client is a natural person, the Bank may require an additional margin (referred to as "Additional Margin Requirement") in accordance with the conditions set out in the Business Regulations.

I.B Secured Exposure amount of the OTC derivative transactions determined on the deal date and the initial margin amount

1. In the case of **Forward Foreign Exchange** Individual Transactions, the amount of the Secured Exposure on the deal date corresponds to the initial margin amount calculated for the deal date. The initial margin amount calculated for the deal date corresponds to the percentage ratio, defined in the table below, of the Client's liability, to be fulfilled to the Bank in the currency specified in the Individual Transaction (for the purpose of this **Collateral** Announcement: **Individual Transaction Nominal Value**)¹:

Legend: egyedi: individual

In the case of Individual Transactions with a maturity of more than 2 years, the amount of the Secured Exposure shall be determined so that the value of the initial margin calculated for the transaction date on the basis of the percentage rate of the above table, is supplemented by the Additional Initial Margin (percentage of the Individual Transaction Nominal Value as shown in the table below) until the

¹ In the case of applying "individual" initial margin weights, in view of the extraordinary market situation, the Bank shall inform the Client about the required amount of initial margin in the Offer, in line with Section II.7.2.2 of the General Terms and Conditions for Global Markets Services, annexed to the Business Regulations as Annex A.

remaining maturity of the Individual Transaction is less than 2 years. In currency pairs not listed in the table below, no Individual Transactions may be leveraged for maturity of more than 2 years.

Currency pair	Additional initial margin
EUR/HUF	1,5%
USD/HUF	2%
EUR/USD	1,5%

In the case of Forward Foreign Exchange Individual Transactions, the currency of the initial margin shall be the fixed currency (i.e. the currency for which the amount of the other currency is calculated by using the exchange rate) specified on the deal date, which may be the first or second currency of the currency pair.

If in the case of the Forward Foreign Exchange Individual Transactions the fixed currency is other than forint (HUF), the forint equivalent of the currency amount of the initial margin is calculated – upon each valuation, i.e. on each banking day, or even during the day in the case of intraday valuation – at the current OTP mid-rate, thus the forint (HUF) equivalent thereof will change based on the prevailing exchange rate.

The Bank defines the initial margin requirement – using the calculation specified above – for the total of the Forward Foreign Exchange Individual Transactions using the following method: the initial margin requirement arises in respect of the Forward Foreign Exchange Individual Transactions generating the open position, or in respect of that part of the Individual Transaction that does not result in a closed position (partially open position); the Individual Transaction resulting in a closed position, or the part of the Individual Transaction that results in a closed position (partially closed position) entails no initial margin requirement. Individual Transactions resulting in closed or partially closed position are those that are of opposite direction compared to one or several concluded Individual Transactions with identical fixed currency, currency pair and maturity; all other Individual Transactions will result in an open or partially open position. Closed or partially closed positions may also result from the combination of **Forward Foreign Exchange** and **FX Swap** (Section 2) Individual Transactions if the above criteria are met.

2. In the case of **FX Swap** Individual Transactions, the amount of the Secured Exposure on the deal date corresponds to the initial margin amount of **Forward Foreign Exchange** transactions having the same parameters.

In the case of Individual Transactions with a maturity of more than 2 years, the rules for Forward Foreign Exchange Transactions must be applied to the determination of the amount of the Secured Claim, in particular the amount of the additional base margin and the currency pairs of Individual Transactions that may be concluded for a maturity of more than 2 years (I.B.1.)

3. In the case of non-deliverable Individual **Forward Deals in Precious Metal (gold and silver)**, the amount of the Secured Exposure on the deal date corresponds to the initial margin amount calculated for the deal date. The initial margin amount calculated for the deal date corresponds to the percentage ratio, defined in the table below, of the Client's liability, to be fulfilled to the Bank in the currency specified in the Individual Transaction (for the purpose of this **Collateral** Announcement: **Individual Transaction Nominal Value**):

	NDF	
	USD	EUR
XAU	10%	10%
XAG	22%	22%

In the case of Individual Forward Deals in Precious metals (gold and silver), the currency of the initial margin shall be the EUR or USD amount specified in the transaction.

Since in the case of the Individual Forward Deals for Precious Metals (gold and silver) the fixed currency is other than forint (HUF), the forint equivalent of the currency amount of the initial margin is calculated – upon each valuation, i.e. on each banking day, or even during the day in the case of intraday valuation – at the current OTP mid-rate, thus the forint (HUF) equivalent thereof will change based on the prevailing exchange rate.

In the case of **Single Currency Interest Rate Swap (IRS)** Individual Transactions, the amount of the Secured Claim on the deal date corresponds to the initial margin amount calculated for the deal date, which is the percentage ratio of the Individual Transaction Notional Amount (Nominal Value) as per the table below²:

Remaining maturity (year)	IRS Ügyfelek							
	HUF	USD	EUR	CHF	JPY	RUB	RON	Other
<=1	1,00%	0,40%	0,40%	0,30%	0,20%		0,50%	1,50%
1< <=3	2,40%	1,20%	1,20%	1,20%	0,50%		2,00%	2,90%
3< <=5	3,30%	2,00%	2,00%	1,80%	0,80%		2,80%	3,80%
5< <=10	4,70%	3,00%	2,80%	2,60%	2,00%		5,00%	5,50%
10< <=15	6,50%	3,50%	3,40%	3,60%	2,60%		7,30%	7,80%
15< <=20	9,50%	4,80%	4,80%	4,60%	3,40%			

Legend: egyedi: individual

In the case of Single Currency Interest Rate Swap Individual Transactions, the currency of the initial margin is the currency of the transaction.

In the case of Single Currency Interest Rate Swap Individual Transactions, if the currency of the initial margin is other than forint (HUF), the HUF value of the currency of the initial margin is calculated at each valuation, i.e. on each banking

² In the case of applying "individual" initial margin weights, in view of the extraordinary market situation, the Bank shall inform the Client about the required amount of initial margin in the Offer, in line with Section II.7.2.2 of the General Terms and Conditions for Global Markets Services, annexed to the Business Regulations as Annex A.

day, or even during the day in the case of intraday valuation – at the current OTP mid-rate, thus the forint (HUF) equivalent thereof changes based on the prevailing exchange rate.

In the case of **Cross Currency Interest Rate Swap (CIRS)** Individual Transactions, the amount of the Secured Claim on the deal date corresponds to the initial margin amount calculated for the deal date, which is the percentage ratio of the Nominal Value of the second currency of the Individual Transaction as per the table below³:

Remaining maturity (year)	EURHUF			
	fixed to fixed	EUR fixed to HUF floating	EUR floating to HUF fixed	floating to floating
<=1	6,40%	6,00%	6,40%	5,70%
1< <3	7,30%	6,10%	7,70%	5,70%
3<= <5	7,90%	6,30%	8,50%	5,80%
5<= <7	8,40%	6,80%	9,20%	5,80%
7<= <12	9,60%	7,50%	9,50%	6,00%
12<= <20	16,20%	12,90%	14,40%	9,20%
Remaining maturity (year)	EURUSD			
	fixed to fixed	EUR fixed to USD floating	EUR floating to USD fixed	floating to floating
<=1	6,50%	6,40%	6,40%	5,90%
1< <3	6,70%	7,10%	7,00%	6,00%
3<= <5	7,10%	7,80%	7,50%	6,10%
5<= <7	7,30%	8,40%	7,90%	6,20%
7<= <12	7,90%	9,20%	8,40%	6,30%
12<= <20	14,50%	11,90%	10,60%	7,70%
Remaining maturity (year)	USDHUF			
	fixed to fixed	USD fixed to HUF floating	USD floating to HUF fixed	floating to floating
<=1	8,40%	7,90%	8,40%	7,50%
1< <3	9,50%	8,00%	9,80%	7,60%
3<= <5	10,20%	8,40%	10,70%	7,60%
5<= <7	10,60%	8,70%	11,20%	7,80%
7<= <12	11,40%	9,20%	12,00%	8,00%
12<= <20	17,50%	15,00%	17,40%	11,70%

In the case of Cross Currency Interest Rate Swap Individual Transactions, the currency of the initial margin is the second currency of the Individual Transaction.

³ In the case of applying "individual" initial margin weights, in view of the extraordinary market situation, the Bank shall inform the Client about the required amount of initial margin in the Offer, in line with Section II.7.2.2 of the General Terms and Conditions for Global Markets Services, annexed to the Business Regulations as Annex A.

In the case of Cross Currency Interest Rate Swap Individual Transactions, if the currency of the initial margin is other than forint (HUF), the HUF value of the currency of the initial margin is calculated at each valuation, i.e. on each banking day, or even during the day in the case of intraday valuation – at the current OTP mid-rate, thus the forint (HUF) equivalent thereof changes based on the prevailing exchange rate.

4. In the case of an **Interest Rate Option** Individual Transaction
 - a. the amount of the Secured Exposure on the deal date corresponds to the Strike Price (Nominal Value) of the Individual Transaction,
 - b. the amount of the initial margin for the deal date and the part of the Secured Exposure that the Client is obliged to cover on the deal date by Collateral are determined individually in the agreement concluded with the Client for the Individual Transaction,
 - c. in the case of the Interest Rate Option Individual Transactions the currency of the initial margin is the deal currency,
 - d. if in the case of the Interest Rate Option Individual Transactions the currency of the initial margin is other than forint (HUF), the forint equivalent of the currency amount of the initial margin is calculated – upon each valuation, i.e. on each banking day, or even during the day in the case of intraday valuation – at the current OTP mid-rate, thus the forint (HUF) equivalent thereof will change based on the prevailing exchange rate.
5. In the case of a **Foreign Exchange Option** Individual Transaction
 - 5/A. Upon concluding a European **Plain Vanilla Option**, the amount of the Secured Exposure on the deal date corresponds to the initial margin amount calculated for the deal date, being the percentage value of the Individual Transaction's Nominal Value calculated at the strike price, as defined in the table below⁴:

⁴ In the case of applying "individual" initial margin weights, in view of the extraordinary market situation, the Bank shall inform the Client about the required amount of initial margin in the Offer, in line with Section II.7.2.2 of the General Terms and Conditions for Global Markets Services, annexed to the Business Regulations as Annex A.

Delta: The delta of the plain vanilla option shows the change in the option's market value depending on the (moderate) change in the price/rate of the option's underlying instrument. The delta of the plain vanilla option is between 0 and 1 in the case of purchased call options, and it is between 0 and -1 in the case of purchased put options. The delta categories in the table are shown in percentage form, i.e. 1 means 100% and -1 means -100%. The |delta| denotes the absolute value of the delta. The delta value is calculated based on the valuation model presented in the information announcement entitled "Calculation of the base and variation margin requirement of certain OTC derivative Individual Transactions and on the conditions determining the change in the secured exposure" when the initial margin requirement is determined. The delta value is calculated by the Bank based on the methodology selected by it.

In the case of the European Plain Vanilla Option Individual Transactions, the currency of the initial margin will be the second currency of the currency pair involved in the transaction.

If in the case of the European Plain Vanilla Option Individual Transaction the currency of the initial margin is other than forint (HUF), the initial margin shall be the forint (HUF) equivalent of the currency amount calculated – upon each valuation, i.e. on each banking day, or even during the day in the case of intraday valuation – at the current OTP mid-rate, thus the forint (HUF) equivalent thereof will change based on the prevailing exchange rate.

5/B. Upon concluding a **Barrier Option**

- a. the amount of the Secured Exposure on the deal date corresponds to the Nominal Value of the Individual Transaction,
- b. the amount of the initial margin for the deal date and the part of the Secured Exposure that the Client is obliged to cover on the deal date by Collateral are determined individually in the agreement concluded with the Client for the Individual Transaction,
- c. In the case of the Barrier Option Individual Transactions, the currency of the initial margin will be the second currency of the currency pair involved in the transaction,
- d. If in the case of the Barrier Option Individual Transactions the currency of the initial margin is other than forint (HUF), the forint equivalent of the currency amount of the initial margin is calculated – upon each valuation, i.e. on each banking day, or even during the day in the case of intraday valuation – at the current OTP mid-rate, thus the forint (HUF) equivalent thereof will change based on the prevailing exchange rate.

6. In the case of an **Inflation Swap** Individual Transaction

- a. the amount of the Secured Exposure on the deal date corresponds to the Strike Price (Nominal Value) of the Individual Transaction,
- b. the amount of the initial margin for the deal date and the part of the Secured Exposure that the Client is obliged to cover on the deal date by Collateral are determined individually in the agreement concluded with the Client for the Individual Transaction,
- c. In the case of the Inflation Swap Individual Transactions the currency of the initial margin is the currency to be paid by the Client,
- d. If in the case of the Inflation Swap Individual Transactions the currency of the initial margin is other than forint (HUF), the forint equivalent of the currency amount of the initial margin is calculated – upon each valuation, i.e. on each banking day, or even during the day in the case of intraday valuation – at the current OTP mid-rate, thus the forint (HUF) equivalent thereof will change based on the prevailing exchange rate.

7. In the case of the **Commodity Swap** Individual Transactions, the amount of the Secured Exposure on the deal date corresponds to the initial margin amount calculated for the deal date, being the percentage ratio of the market value of the Individual Transaction's underlying asset as shown in the table below:

Product Category	Product	Currency	Weights for Bullet Swaps	Weights for Asian Swaps

Comments:

The product-transaction type combinations indicated in grey are not available for dealing.

Bullet swap: a swap transaction, where upon settlement one party to the transaction pays a predetermined, fixed price, while the other party pays the price of the transaction's underlying instrument observed on the maturity date, projected on the nominal value. The transaction is a single-period transaction, payments are settled only once, upon the maturity of the transaction.

Asian swap: a swap transaction, where upon settlement one party to the transaction pays a predetermined, fixed price, while the other party pays the arithmetic average of the daily closing prices of the transaction's underlying asset observed during a predetermined period, projected on the nominal value. The transaction may include several periods.

In the case of Commodity Swap Individual Transactions, the currency of the initial margin is the currency of the transaction in which the payment is made.

If in the case of the Commodity Swap Individual Transactions the currency of the initial margin is other than forint (HUF), the forint equivalent of the currency amount of the initial margin is calculated – upon each valuation, i.e. on each banking day, or even during the day in the case of intraday valuation – at the current OTP mid-rate, thus the forint (HUF) equivalent thereof will change based on the prevailing exchange rate.

II. Margin requirement of exchange-traded derivative transactions

1. In the case of BSE Stock Exchange Futures and BSE Stock Exchange Options, the Bank accepts as Base Collateral (i) cash collateral and (ii) securities defined by KELER as eligible. The collateral acceptance rate of the security deposit corresponds to the acceptance rate applied by KELER.
2. The Bank will accept as collateral for only cash collateral defined by the relevant clearing house as Base Collateral for Other Stock Exchange Futures not falling within the scope of Section II.1. The currency of the cash collateral always corresponds to the trading and settlement currency of the underlying product of the Other Stock Exchange Futures Transaction.
3. The Base Collateral shall be equal to 150% of the figure prescribed by the clearing house performing the settlement of the BSE Stock Exchange Futures Transactions, the BSE Stock Exchange Option Transactions and the Other Stock Exchange Futures Transactions.
4. *In the case of BSE Stock Exchange Futures, BSE Stock Exchange Options and Other Stock Exchange Futures, the Bank accepts as Supplementary Collateral cash collateral. The currency of the cash collateral always corresponds to the trading and settlement currency of the underlying product of the Individual Transaction.*
5. *Special provisions for Institutional investors*
 - 5.1. Coverage for Base Collateral: Institutional *investors* may provide Base Collateral for Other Stock Exchange Futures Transaction in the form of the instruments and under the terms and conditions set out in the effective Annex 1 to the Collateral Announcement "Acceptance rates of the eligible Collateral for Global Markets Individual Transactions" *and does not have to correspond the currency to the trading and settlement currency of the underlying product of the Individual Transaction.*
 - 5.2. *Institutional investors may also settle the instruments specified as collateral for the Base Collateral for BSE Futures Transactions, BSE Options Transactions and Other Futures Transactions in favor of the Bank at KELER as securities blocked for other beneficiaries, in accordance with the provisions of the General Business Regulations of KELER.*
 - 5.3. Base Collateral Rate: 120% of the rate set by the clearing house clearing BSE Stock Exchange Futures Transactions, BSE Stock Exchange Options, and Other Stock Exchange Futures Transactions. *Up to 100% of the Base Collateral may only be covered by the instruments specified in Section II. 1. in the case of BSE Stock Exchange Futures and BSE Stock Exchange Options, and in Section II.1. in the case of Other Stock Exchange Futures; the remaining 20% of the Base Collateral may be provided by the Institutional investors against its free counterparty limit set by the Bank.*

III. Determining the Additional Margin Requirement

Required initial margin:	The individual amount of the “Additional Margin Requirement” (HUF)	The “Additional Margin Requirement” sum total (HUF)
If the Initial Margin Requirement reaches or exceeds HUF 800,000,000 but is less than HUF 1,100,000,000 HUF, then	HUF 300,000,000 in security deposit shall be provided,	and the aggregate security deposit amount will be HUF 300,000,000.
If the Initial Margin Requirement reaches or exceeds HUF 1,100,000,000 but is less than HUF 1,500,000,000 HUF, then	a further HUF 200,000,000 in security deposit shall be provided,	and the aggregate security deposit amount will be HUF 500,000,000.
If the Initial Margin Requirement reaches or exceeds HUF 1,500,000,000 but is less than HUF 2,000,000,000 HUF, then	a further HUF 1,000,000,000 in security deposit shall be provided,	and the aggregate security deposit amount will be HUF 1,500,000,000.
If the Initial Margin Requirement reaches or exceeds HUF 2,000,000,000, then	a further HUF 500,000,000 in security deposit shall be provided,	and the aggregate security deposit amount will be HUF 2,000,000,000.

The Bank retains the right to reduce the amount of the Additional Margin Requirement or the aggregate amount of the Additional Margin Requirement stipulated in this announcement in specific cases, in relation to an Individual Transaction contracted with the Client and/or with reference to the nature and risks of the same, and to enter into an individual agreement with the Client on determining the amount of the Additional Margin Requirement.

IV. List of eligible Collaterals (securities) and their acceptance rate

The list of the eligible Collaterals (securities) and their acceptance rate are included in Annex 1 of this Collateral Announcement.

V. Miscellaneous provisions

Matters not regulated in this Collateral Announcement shall be governed by the Business Regulations. Unless this Collateral Announcement provides otherwise, the terms used herein shall have the meaning defined in the Business Regulations.
