

# Key Information Document

## Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## Product

**Product name:** Interest Rate Floor

**Name of the PRIIPs KID Manufacturer:** OTP Bank Plc. **Date of Production:** 9/21/2018

<https://www.otpbank.hu>

Call +36-1-288-7540 for more information

**Competent Authority:**  
Hungarian National Bank

**You are about to purchase a product that is not simple and may be difficult to understand.**

## What is this product?

Type	Interest Rate Floor			
Objectives	Interest rate floors are binding agreements under which the buyer receives a compensation payment on the outstanding notional at the end of each calculation period (payment dates) when the reference rate is fixed below the agreed floor rate on the fixing date. In return, the buyer pays an amount of money (option premium) on a pre-agreed date (option premium payment date).			
	Date	9/21/2018	Currency	EUR
	Tenor	2 years	Strike	0.10%
	Notional Amount	EUR 2,000,000	Variable interest rate	6 months
	Customer	Customer buys	Floor premium	EUR 10,000
Intended retail investor	This product, Interest Rate Floor, is aimed at retail clients, who are interested in hedging and who have a short term investment horizon of less than 3 years. The Interest Rate Floor is a product for advanced investor with good knowledge of and/or experience with financial products. The investor can bear losses beyond the invested amount and puts no emphasis on capital protection.			

## What are the risks and what could I get in return?\*

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class.

This rates the potential losses from future performance at a very high level, and extreme market conditions are very likely to impact the capacity of OTP Bank Plc. to pay you.

**Be aware of currency risk.** You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

\* Further details can be found in the 'How long should I hold it and can I take money out early?' section of this document.

## Performance scenarios

Investment of EUR 10,000 Scenarios		1 year	2 years (Recommended period) holding
Stress scenario	What you might get back after costs	EUR 4,853	EUR 11,945
	Average return each year	-51.09%	9.23%
Unfavourable scenario	What you might get back after costs	EUR 15,482	EUR 15,431
	Average return each year	54.09%	24.04%
Moderate scenario	What you might get back after costs	EUR 16,994	EUR 16,992
	Average return each year	68.96%	30.12%
Favourable scenario	What you might get back after costs	EUR 18,377	EUR 18,427
	Average return each year	82.57%	35.47%

This table shows the money you could get back over the next 2 years, under different scenarios, assuming that you invest EUR 10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation of extreme market conditions where we are not able to pay you.

Under extreme market conditions it could happen that this product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the recommended holding period. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so.

The figures shown include all the costs of the product itself, and include the costs of your service provider.

The figures do not take into account your personal tax situation, which may also affect how much you get back.

## What happens if OTP Bank Plc. is unable to pay out?

In case OTP Bank Plc is placed under resolution proceedings, the client's claim against the bank arising from the product may be fully or partially written off and/or converted to ordinary shares of OTP Bank Plc by the resolution authority. If losses of the client under the resolution proceedings exceed losses that would have been suffered in case of OTP Bank Plc's liquidation under normal insolvency proceedings, the client is entitled to compensation paid by the Resolution Fund. The compensation shall be equal to the difference between losses suffered under resolution and liquidation. In the absence of resolution proceeding – if the OTP Bank Plc is insolvent – the National Bank of Hungary withdraws OTP Bank Plc's activity license and the competent court orders the liquidation proceeding against OTP Bank Plc. Under the liquidation proceeding – if the derivatives contract contains a contractual netting clause – the creditor is entitled to execute its rights under the contractual netting. If the creditor has claim against OTP Bank Plc after the netting or in the absence of netting, then the creditor has the right to file its claim to the appointed liquidator in due course. Upon this application the liquidator shall register the undisputed claim and shall pay the claim in that order and in time as prescribed by the law if the property under liquidation is sufficient to execute this payment. In the absence of sufficient property, the liquidator shall certify to the creditor that the claim will not be satisfied.

## What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account the one-off costs.

The amounts shown here are the cumulative costs of the product itself, for two different holding periods. The figures assume you invest EUR 10,000. The figures are estimates and may change in the future.

### Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment of EUR 10,000	If you cash in at the recommended holding period
Total costs	EUR 28.00
Impact on return (RIY) per year	0.36 %

### Composition of costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- What the different cost categories mean.

#### This table shows the impact on return per year

One-off costs	Entry costs	0.36%	The impact of the costs already included in the price. This includes the costs of distribution of your product.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.

### How long should I hold it and can I take money out early?

Recommended holding period: This product is designed to be held to the agreed 2 years date in order to match your investment requirement.

Under extreme market conditions you may not be able to cash in early, and you may have to pay significant extra costs to cash in early. It is a product to be entered into for its term that cannot be easily sold. Early termination may occur (i) if certain events of default or other termination events occur or (ii) at the sole discretion of OTP Bank Plc., in which case early termination payments may apply. Early exit impact: If the product is terminated early, in whole or in part, an Early Termination Payment may become payable by either you or OTP Bank Plc.. The Early Termination Payment is linked to market parameters and could be a substantial loss or gain to you. Settlement on early termination will be specific to your Interest Rate Floor and will be influenced by a number of factors which include but are not limited to: whether it is an increasing or decreasing interest rate environment; the movement of the interest rates since the trade date; the amount affected by the early termination.

The Early Termination Payment amount represents the economic value of what OTP Bank Plc. would have paid or received if the product continued as agreed.
