Upon the occurrence of the following events or conditions, the acceptance rate (acceptance value) of the Collaterals, stipulated in Annex 1, will automatically decrease to 0% without any further legal action:

- a) any change in the legislative environment or any other reason not imputable to the Bank terminates the marketability of the given Collateral or substantially reduces the market liquidity thereof, or
- b) no market price of adequate quality can be linked to the Collateral, or
- c) in the case of equities, if the equity is no longer listed among the "Premium" securities constituting the BUX index, or
- d) in the case of mutual fund shares, if the mutual fund is transformed into a closed-end fund or a decision to this effect is adopted, or
- e) if an insolvency procedure, bankruptcy proceedings, enforcement procedure or any other procedure that may entail the liquidation of the given entity (cancellation from the public register) is initiated against the issuer of the Collateral or – in the case of securities – against the entity that undertakes the liability to pay any amount based on the securities to the holder thereof, or any such circumstance arises that qualifies as a Credit Event according to the latest issue of the ISDA Credit Derivatives Definitions (irrespective of whether this document applies to any of the transactions concluded by the affected party).

The valuation may be performed based on several methods, the results of which may vary, and the method may be selected by relying on a number of sources. The selection of the valuation method and the source thereof is the exclusive right of Bank, which is expressly accepted by the Client in view of the provisions of the Investment Services Business Regulations.

This annex forms part of the document entitled "COLLATERAL ANNOUNCEMENT to Investment Services Business Regulations". Issues not regulated in this annex shall be governed by the Investment Services Business Regulations.
