

Dear Customer!

We hereby kindly inform you that, differently from our previous announcements, our **Bank obliges the use of the ViCA application** on the Electra Terminal channel **as of 14 September 2019 only for users having (also) a retail bank account.**

An **SMS** containing the code required **for the registration of the ViCA application will be sent** to the telephone number already notified to the Bank **only to users** who manage a **retail bank account** at the Electra Terminal.

Users managing only corporate bank accounts may continue to use the Electra Terminal with the current authentication method.

This measure is temporary for users who only manage corporate bank accounts. Phone number notification to the Bank is a prerequisite for ViCA identification.

Please pay close attention to the bank messages sent to the Electra Terminal regarding the ViCA application.

Thank you for your understanding!

Budapest, September 13, 2019

Sincerely:

OTP Bank Plc.
