Solactive AI infrastructure enablers Decrement 5% Index	SOLAIIE5 Index	EUR	https://www.solactive.com/index/DE000S

The Solactive AI Infrastructure Enablers Decrement 5% Index (ISIN Code: DE000SL0U5Q4) is an equity market index administered by Solactive AG, with its calculation, maintenance, and publication carried out by Solactive AG. It was launched on August 03, 2026. The index provides exposure to a basket of 10 U.S. technology companies operating across key segments of the artificial intelligence infrastructure ecosystem, including semiconductors, memory solutions, connectivity, power supply systems, and data storage. The index components are equally weighted on a daily basis.

The Solactive AI Infrastructure Enablers Decrement 5% Index, denominated in Euro, presents a currency exchange risk because the prices of its components, quoted in U.S. Dollars, are converted into Euro for the calculation of the index. Therefore, the performance of the index may be significantly affected, positively or negatively, by fluctuations of the U.S. Dollar against the Euro.

The Solactive AI Infrastructure Enablers Decrement 5% Index is an index where all net dividends paid by its constituent stocks are reinvested and a fixed deduction of 5% per annum is applied. If the actual net dividends paid are lower than (or higher than) this deduction, the performance of the index will be reduced (increased) compared to an index where the dividends are not reinvested.

Type

This product is an unsecured debt instrument governed by English law.

Term

This product has a maturity of 05/11/2030 but can be redeemed earlier according to the conditions indicated in the "objectives" section below.

Objectives

This product is designed to provide a return when the product is redeemed (either at maturity or when automatically redeemed early). It is possible for the product to be automatically redeemed early based on pre-defined conditions. If the product is not redeemed early, both the return and the capital redemption amount will be linked to the performance of the Reference Underlying. Your capital will be at risk when investing in this product.

Automatic Early Redemption
On any Early Redemption Observation Date, if the level of the Reference Underlying is at or above the corresponding Early Redemption Barrier, the product will be redeemed early and you will receive 100% of the Nominal Value plus the corresponding Early Redemption Coupon.

Final Redemption
On the Maturity Date, provided that the product has not been redeemed early, you will receive a final redemption amount.
- If the Final Level of the Reference Underlying is at or above the Final Barrier, you will receive 100% of the Nominal Value plus the Final Coupon.
- If the Final Level of the Reference Underlying is below the Final Barrier and is at or above the Capital Barrier, you will receive 100% of the Nominal Value.
- Otherwise, you will receive the Final Level of the Reference Underlying multiplied by the Nominal Value which cannot be lower than the Final Redemption Floor. In this scenario, you will suffer a partial loss of your invested amount.

Additional Information
- The level of the Reference Underlying corresponds to its value expressed as a percentage of its Initial Value.
- The Initial Value of the Reference Underlying is its value observed on the Initial Observation Date.
- The Final Level of the Reference Underlying is its level observed on the Final Observation Date.
- Coupons are expressed as a percentage of the Nominal Value.
- The product is available through a public offering during the applicable offering period in the following jurisdiction(s): Hungary
- Extraordinary events may lead to changes to the product's terms or the early termination of the product and could result in losses on your investment.

Intended Retail Investor

The product is aimed at investors who:
- Have specific knowledge or experience of investing in similar products and in financial markets, and have the ability to understand the product and its risks and rewards.
- Seek a product offering capital growth and have an investment horizon in line with the recommended holding period stated below.
- Are able to bear a partial loss, or total loss of their investment and any potential return in case of default of the Issuer and / or Guarantor.
- Understand that the minimum reimbursement only applies at maturity and they could receive less than this amount if the product is sold beforehand.
- Are wiling to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator show

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Summary Risk Indicator

Lower risk 1 2 3 4 **5** 6 7 **Higher risk**

The risk indicator assumes you keep the product for 4 years 1 day.
The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions are very unlikely to impact our capacity to pay you.

You are entitled to receive back at least 35% of your capital (where "capital" means Nominal Value and not invested amount). Any amount over this, and any additional return, depends on future market performance and is uncertain. However, this protection against future market performance will not apply if you cash in before the Maturity Date.

If we are not able to pay you what is owed, you could lose your entire investment.

Inflation Risk : if the economic situation is characterized by a high inflation persisting throughout the life time of the product, then the “real” return of the product, equal to its return minus the inflation rate, might be negative.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Market could develop very differently in the future.

Recommended holding period:		**Until the product is called or matures** This may be different in each scenario and is indicated in the table	
Example Investment:		**HUF 10,000,000**	
		If you exit after 1 year	**If you exit at call or maturity**
Scenarios			
Minimum*	**HUF 3,500,000**	**The return is only guaranteed if you hold the product until its recommended holding period and the Issuer of the product and Société Générale (the Guarantor) are able to meet their obligations under the product.**	
Stress	**What you might get back after costs**	**HUF 3,433,441**	**HUF 3,500,000**
Product ends after 4 years 1 day	Average return each year	-65.7%	-23.1%
Unfavourable	**What you might get back after costs**	**HUF 9,457,113**	**HUF 13,400,000**
Product ends after 1 year 11 months 29 days	Average return each year	-5.4%	15.8%
Moderate	**What you might get back after costs**		**HUF 11,700,000**
Product ends after 11 months 29 days	Percentage Return		17.0%
Favourable	**What you might get back after costs**		**HUF 11,700,000**
Product ends after 11 months 29 days	Percentage Return		17.0%

(*) the return shown in the Minimum Scenario is the Minimum Reimbursement and does not include other type of return such as guaranteed coupon payments.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The % figures in the table represent the potential positive (green) or negative (red) returns you might achieve at the end of the recommended holding period (last column) or by selling the product before (previous column) and for a stressed, unfavourable, moderate and favourable scenario (per line). These scenarios were calculated using simulations based on the underlying's past performance.

WHAT HAPPENS IF SOCIÉTÉ GÉNÉRALE IS UNABLE TO PAY OUT?

If the Issuer defaults you may only claim any unpaid amount from Société Générale (the Guarantor). Should Société Générale default or file for bankruptcy, you may suffer a partial or total loss of the invested amount. If the Issuer and/or the Guarantor becomes subject to resolution measures in the form of the bail-in tool ("bail-in"), your claim may be reduced to zero, converted into equity or its maturity may be postponed. Please be aware that your Investment is not covered by any investor compensation or guarantee scheme.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
The duration of this product is uncertain as it may terminate at different times depending on how the market evolves. The amounts shown here consider two different scenarios (early call and maturity). In case you decide to exit before the product ends, exit costs may apply in addition to the amounts shown here.
We have assumed:
- HUF 10,000,000 is invested
- a performance of the product that is consistent with each holding period shown.

	If the product is called at the first possible date 05/11/2027	If the product reaches maturity
Total costs	HUF 824,000	HUF 824,000
Annual cost impact(*)	10.5%	2.3% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at maturity your average return per year is projected to be 19.3% before costs and 17.0% after costs.

One-off costs upon entry or exit		**If you exit after 1 year**
Entry costs	8.2 % of the amount you pay in when entering this investment	HUF 824,000
Exit costs	0.5 % of your investment before it is paid out to you	HUF 50,000

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended Holding Period: 4 years 1 day, which corresponds to the product maturity.

Under normal market conditions, Société Générale or an entity of its group ensures a daily secondary market during the life of the product by providing bid and offer prices and the difference between the bid and offer prices (the spread) will not be more than 1% of the Nominal Value. If you want to sell the product before the Maturity Date, the price of the product will depend on market parameters at the time you wish to sell and you may sustain a partial or total capital loss. In unusual market condition, the resale of the product may be temporarily or permanently suspended.

HOW CAN I COMPLAIN?

Any complaint regarding the person advising on, or selling, the product can be submitted directly to that person. Any complaint regarding the product or the conduct of the product manufacturer can be submitted to Société Générale at the following address: SOCIETE GENERALE, Regulatory Information Department, 17 cours Valmy, 92987 PARIS LA DEFENSE CEDEX, FRANCE - SG-complaints-kid@sgcib.com (http://kid.sgmarkets.com).
